Professional Experience

Sr. Design Engineer

The McClatchy Company, March 2013 to Present

Design and develop wireframes, mock-ups, and functional prototypes for the third largest newspaper company in the United States. Utilize usability testing to evolve device agnostic designs to improve company initiatives and user experience. Implement changes and resolve tickets in an agile environment. McClatchy sites reach more than 65.5 million unique visitors and serve more than 312 million pageviews monthly.

Creative Director / Sole Proprietor

WebMark Art. Oct. 1999 – Present

Design, development, and maintenance for small to medium sized business websites. Specializing in custom responsive designs and WordPress sites.

Design Engineer

McClatchy Interactive, February 2007 to March 2013

Designed and provided front-end code for proprietary CMS interface used by 30 daily newspapers across the United States. Developed functionally coded mock-ups for various company initiatives. Created and maintained company website, Intranet, Extranet, and registration database.

GUI Developer

McClatchy Interactive, November 2004 to February 2007

Designed and developed the user interface for our enterprise templating, content management and registration software used throughout the newspaper industry. Responsible for the design, development, and implementation of internal, affiliate, and customer websites for The McClatchy Company and their 30 daily newspaper markets.

Development Manager / Senior Web Developer

Professional Equipment Inc., May 2003 - August 2004

Managed a staff of four front-end developers in the creation and maintenance of over 600 client websites. Coordinated the Development and Customer Service teams to ensure quality control and customer satisfaction. Developed server-side scripts to reduce redundancies across our customer sites and to increase speed of production.

Web Developer

Manchester Technologies Inc., Feb. 2000 - Sept. 2001

Responsible for daily design and programming updates of corporate websites and web applications.
